

LOADING JIG

For the

ENVOY

PLATE DEVELOPING TANK

This accessory is a particularly simple aid for changing-bag, or within-bed loading. It is therefore a boon to tourists who must necessarily load their material under difficult conditions.

For complete darkroom use, this Envoy jig is indispensable for quick, and easier loading.

THE METHOD OF USE IS AS FOLLOWS

- (a) Place in readiness, and in their metal holders, four Plates, or Sheet films.
- (b) Remove lid of Developing Tank.
- (c) In place of lid, insert the loading jig so that the end having the wider feet lies over the tank filler-hole.
- (d) Insert two plates, or films, through the two slots in the jig.
- (e) Remove, and turn jig upside-down feeling that the end having the wider feet again comes down over the tank filler-hole.
- (f) Insert two further plates, or films through the two slots in the jig. Then remove jig from Tank.
- (g) Replace lid of Tank ready for development process.
